Design this equipment to meet its function

100% test content. Based on the design life of the item, the expected use, and the nature of the item (e.g., criticality, complexity, etc.).

100% test content. Based on the design life of the item, the expected use, and the nature of the item (e.g., criticality, complexity, etc.).

100% test content. Based on the design life of the item, the expected use, and the nature of the item (e.g., criticality, complexity, etc.).

To adjust, read the design-related drawings.

Descriptive details are indicated (the following indicated)

100% test content.

Design this equipment to meet its function

The design should be able to be adjusted to meet the required performance. The design should be able to be adjusted to meet the required performance. The design should be able to be adjusted to meet the required performance.

NOTE: If no signal receiving device is available, all
signals shall remain on.
NOTE: If the signal receiving device is not available,
NOTE: If the signal receiving device is not available,
NOTE: If the signal receiving device is not available,

SECRET, and the correct signal device.
