THE HUMAN NERVOUS SYSTEM: THE CENTRAL NERVOUS SYSTEM

FIGURE 12.1

FIGURE 12.2

THE HUMAN NERVOUS SYSTEM: THE PERIPHERAL NERVOUS SYSTEM

- 1. The peripheral nervous system (PNS) consists of all the neurons that are not part of the central nervous system (CNS).
- 2. The PNS is divided into the somatic nervous system (SNS) and the autonomic nervous system (ANS).
- 3. The SNS controls voluntary movements, while the ANS controls involuntary functions.
- 4. The ANS is further divided into the sympathetic and parasympathetic systems.

System	Function
Somatic Nervous System (SNS)	Controls voluntary movements
Autonomic Nervous System (ANS)	Controls involuntary functions
Sympathetic Nervous System	Controls 'fight or flight' responses
Parasympathetic Nervous System	Controls 'rest and digest' responses

Figure 1
 (a) Schematic of the experimental setup for the measurement of the β phase transition temperature of the Bi_2Te_3 thin film. The thin film is grown on a substrate and is measured in a magnetic field H applied perpendicular to the film plane. The temperature T is varied to observe the β phase transition.

Sample	Thickness (nm)	Growth Method	Transition Temperature T_{β} (K)		Transition Width ΔT_{β} (K)	Transition Entropy ΔS_{β} (meV/K)	Transition Enthalpy ΔH_{β} (meV)
			0 T	10 T

Table 1
 Summary of the β phase transition temperature, transition width, transition entropy, and transition enthalpy for the Bi_2Te_3 thin films of different thicknesses.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the integrity of the financial system and for the ability to detect and prevent fraud. The text notes that without reliable records, it would be difficult to track the flow of funds and identify any irregularities.

2. The second part of the document outlines the specific procedures that must be followed to ensure the accuracy of these records. This includes the requirement that all transactions be recorded in a timely and consistent manner. It also stresses the need for regular audits and reconciliations to verify the data. The document provides detailed instructions on how to handle various types of transactions, such as sales, purchases, and transfers, and how to document them properly.

3. The final part of the document discusses the consequences of failing to comply with these requirements. It states that any individual or organization that does not maintain accurate records may be subject to penalties, including fines and suspension of operations. The text also highlights the potential damage to the organization's reputation and the trust of its stakeholders if such failures are exposed. It concludes by reiterating the importance of adherence to these standards for the long-term success and stability of the organization.

1. The first part of the document is a letter from the author to the editor, dated 10/10/1954. The letter discusses the author's interest in the subject of the journal and the author's hope that the journal will be a valuable contribution to the field.

2. The second part of the document is a letter from the editor to the author, dated 10/10/1954. The editor expresses his interest in the author's work and his hope that the author's work will be a valuable contribution to the field.

3. The third part of the document is a letter from the author to the editor, dated 10/10/1954. The author discusses the author's interest in the subject of the journal and the author's hope that the journal will be a valuable contribution to the field.

4. The fourth part of the document is a letter from the editor to the author, dated 10/10/1954. The editor expresses his interest in the author's work and his hope that the author's work will be a valuable contribution to the field.
