47th Street station

49th Street station

50th Street station

It is expected that additional construction of subway stations will be needed to meet the needs of the city's growing population. The city is currently studying the feasibility of several new stations, including a station at 55th Street and a station at 60th Street.

The city is also studying the feasibility of a new subway line that would run from the city center to the airport. This line would provide a direct connection between the city and the airport, which would be a major benefit for commuters.

THESE ARE SOME OF OUR

FREE SERVICE

IBM is the computer giant in 27 countries — the "language" of the computer is one we give. Applications specialists use extensive range of priced solutions, supported by more than 2000 service and technical centers in 100 cities. IBM's service centers are staffed with people who speak your language.

FREE TRANSPORTATION SERVICE

Business calls its "IBM order" direct to the factory. Increasing efficiency with the IBM solution. Business calls. Business handles. IBM's service and technical centers in 100 cities. IBM's service centers are staffed with people who speak your language.

FREE DATA MANAGEMENT

In the same system, the data handling software can be used to handle the data. IBM's service and technical centers in 100 cities. IBM's service centers are staffed with people who speak your language.

BASIC PRODUCTS

STRONG TYPING EQUIPMENT HAS BECOME A PART OF EVERYONE'S WORKING LIFE. THE QUALITY OF THE TYPE AND THE SPEED OF THE TYPESETTING PROCESS ARE THE KEY TO THE SUCCESS OF ANY BUSINESS. STRONG TYPING EQUIPMENT IS THE ANSWER TO YOUR NEEDS FOR SPEED AND ACCURACY.

In addition to the new models, we also have many other models available. We are sure you will find the product that meets your needs.

NEW MODEL TYPE WRITER AND TYPE PRINTER

TELETYPE EQUIPMENT AT WORK...

Orders

Orders made on automatic teletype units are the most rapid and efficient of any in use, providing a speed of communication that puts to rest all of the usual ordering delays.

Automatic Handwriting

Teletype systems can be made to operate on a basis of automatic handwriting, thus eliminating the need for operators and saving space.

Handwriting Units

Handwriting units are designed for average office conditions in which space considerations favor the compact but complete units which are in constant operation.

Manual Operation

Teletype systems utilize facilities which allow the operator to complete messages instantaneously, and permit easy correction.

Size

Our size units are designed to fit in spaces as small as twelve inches high, making them the most compact.

Power Requirements

Teletype systems are designed to run on any available supply of power, by connecting them to any available electrical equipment.

Reliability

In operation on any one of the equipment in which we have confidence, they provide a reliability that has no equal. Maintenance and repairs are the least expensive because of their size.

Real Value

One of the most valuable operating aids that have been developed for teletype units is our special equipment which enables us to guarantee to you the fastest, best deal.

How It Works

A simple paper airplane is an approximation of an airplane. Unlike a real airplane, there are no engines, wings, or tail. The only forces that act on the airplane are lift, drag, and gravity. The airplane will fly if the lift is greater than the weight and the drag is greater than the weight.

Materials: Paper, Scissors, and Tape

Take a piece of paper and fold it in half. Then fold the corners of the paper towards the center line. Fold the paper in half again. This is the fuselage of the airplane. The wings are made by folding the paper outwards from the center line.

Design

The design of a simple paper airplane is based on the aerodynamic forces of lift, drag, and gravity. The wings are designed to create lift, and the tail is designed to create drag. The fuselage is designed to be as light as possible while still being strong enough to hold the wings and tail together.

Why a Simple Paper Airplane is a Good Design

A simple paper airplane is a good design because it is easy to make and fly. It is also a good design because it is a good approximation of a real airplane. The simple design allows us to study the basic principles of aerodynamics without the complexity of a real airplane.

How It Works

The simple paper airplane is a good design because it is easy to make and fly. It is also a good design because it is a good approximation of a real airplane. The simple design allows us to study the basic principles of aerodynamics without the complexity of a real airplane.

How It Works

The simple paper airplane is a good design because it is easy to make and fly. It is also a good design because it is a good approximation of a real airplane. The simple design allows us to study the basic principles of aerodynamics without the complexity of a real airplane.

How

The simple paper airplane is a good design because it is easy to make and fly. It is also a good design because it is a good approximation of a real airplane. The simple design allows us to study the basic principles of aerodynamics without the complexity of a real airplane.

A national organization of women serving women
professionals throughout the country. Membership is
open to all women. Many of our members have
earned advanced degrees.

MEMBERSHIP AND DEVELOPMENT

The leading edge of the professional woman
is always and constantly a step
ahead in education and experience. She
is always the woman who has learned
to do a job because of her own initiative in
her own mind and heart.

Environmental and Safety Engineering helps design and develop safe and healthy work environments.

Health and Safety Engineering helps protect and improve the health and safety of workers.

Control Systems Engineering helps design and develop control systems for industrial processes.

Electrical and Electronic Engineering helps design and develop electrical and electronic systems.

Electrical and Electronic Engineering helps calculate, design, develop, test, and maintain electrical, electronic, and communication systems. This includes working on power systems, control systems, and communication systems.

Electrical (Mechanical) and Mechanical Engineering helps design, develop, test, and maintain mechanical systems. This includes working on power systems, control systems, and communication systems.

Our unique academic programs are designed to ensure success.

UNIVERSITY OF THE SOUTH ALABAMA

Integrating college preparation with
community learning experiences to help you
develop skills you'll need in the workforce.
Integrating academic preparation with
college experiences to provide a smooth

transition to residential and non-
residential learning experiences. We will
use the expertise and resources of
our campus and community partners
to provide students with a variety of
learning experiences, including
internships, cooperative education,
and experiential learning.

We'll help you get the most out of your
college experience. We'll help you
develop the skills you'll need in the
workforce. We'll help you get the

COMPANY GROWTH
AND YOUR
PROGRESS

Several factors change the growth rate and development and
structure of the population. These factors are: change in birth rate,
and immigration and emigration. Immigration is the movement of
individuals into a population and emigration is the movement of
individuals out of a population.

Other factors affecting the population include: change in
the carrying capacity of the environment, which is the maximum
number of individuals that the environment can support.

Population density and growth rate are related. As
population density increases, the growth rate usually decreases.
This is because the density of the population affects the amount
of resources available to each individual.

FOR YOUR BENEFIT...AND

For you and your business, consider our help...

FINANCING

Having extra working funds will give you the flexibility to make sales, strengthen your buying and financing power.

REVENUE

Maximize your sales and increase your productivity with our software and management services.

TAXES

Maximize your business opportunities and minimize business risks with our tax and financial services. We'll help you take full advantage of every tax deduction.

At Small Business Services, we're committed to helping you succeed. Contact us today.

MARKETING

Our marketing services can help you reach your target market and increase your sales. We'll help you develop a marketing strategy that works for your business. We'll also help you with your advertising and public relations. We'll help you with your sales and customer service. We'll help you with your business development.
