don't get caught short

LOOK DEEP ENOUGH TO GET THE BEST CATCH FOR YOUR DATA COMMUNICATIONS EQUIPMENT

When it comes to Data Communications you want reliability and not worries about "The One That Got Away". You want to look deeply enough to insure the best operational system for your needs. You did that when you selected Teletype Equipment.

Equally important to equipment reliability and performance is ongoing Product Service Support. That means planning ahead to avoid most problems before they occur and knowing who to call when you need help.

To insure that your Data Communications System remains dependable and efficient you should "Get A Line" on your Teletype Representative and the Full Range of Services he offers. He can tackle and solve your communications problems through a Service Program tailored to your specific needs. Give him a call today!

HERE ARE A FEW IMPORTANT PRODUCT SERVICES AVAILABLE TO YOU

Professional Service

Teletype's Representatives located throughout the United States and Canada are real Professionals.

- Factory supervised training.
- Complete support of Teletype's facilities.
- Availability of a multi-million dollar parts and test equipment inventory.

Set Preparation and Installation

Teletype offers these most important services to start your system properly.

- Unpacking, assembly and test performance to insure proper equipment operation.
- On-line system tests to insure that all your parameters are met.
- Complete operator training and instruction for your personnel.

On-Site Repair

Teletype Service Representatives are trained in the latest maintenance and repair procedures for your equipment. They can usually pinpoint a problem quickly and have the parts to correct it at the site.

Exchange Service

You can save up to 50% of the price of a module through Teletype's Exchange Service.

Full Service Maintenance

On-the-job equipment failures can prove both costly and inconvenient. Even the most reliable equipment fails sooner or later when preventative measures are not taken. Avoid this situation with a Full Service Maintenance Program.

- Scheduled inspections at your convenience.
- Your equipment cleaned, inspected, lubricated, adjusted and fully tested . . . ready to perform.
- All parts included at no additional cost.
- Interim service available at no additional cost.
- One annual expense for all service needs.

National Agreements

National Service Programs are available, customized for large or small systems to fill specific needs.

Equipment Modification

Special features and functions not found in your present Teletype Equipment may be available to you.

Equipment Reconditioning

Teletype offers major repair and reconditioning services which can result in substantial savings to you. Before writing off your old terminal, let our expert technicians help to determine whether it's more economical to replace or recondition it.
